

CBN Isolate

≥ 95% Pure CBN

≤ 0.01% THC

APPEARANCE	Fine white powder
ODOR	Odor Free
DERIVED FROM	Cannabis sativa (hemp) flower
SHELF LIFE	1 Year

THE PUREST FORM OF CBN DERIVED FROM HEMP WITH ZERO THC

THC-Free CBN Isolate with a guaranteed potency of 95% or greater Cannabinol (CBN) is processed and refined by abiding by stringent quality standards. For added confidence, ISO 17025 accredited third-party full-panel COAs confirm CBN Isolate quality, purity and potency while verifying compliance regarding pesticides, heavy metals and other impurities.

Recognizing the traditional inefficient conversion of THC into CBN and understanding the promising benefits of CBN, our scientists and chemists developed a method to convert hemp-derived carboxylic acid forms of cannabinoids into CBN to produce an ultra-pure, THC-Free, CBN Isolate powder to meet the growing demand.

Red Mesa's manufacturing process effectively removes other cannabinoids, flavonoids, waxes, chlorophyll and terpenes, producing a nearly odorless and tasteless CBN Isolate powder. The resulting fine, white, highly purified CBN powder provides accurate dosing and facilitates ease in blending into other ingredients.

DELIVERING THE CONFIDENCE WE PROMISE

Our ISO 17025 accredited third-party lab tests every batch for cannabinoid profile, residual solvents, pesticides, heavy metals, microbial counts and mycotoxins per R68-37 assuring our products meet our quality standards as well as current federal and state regulations.
