## CBC Isolate

≥ 95% Pure CBC

≤ 0.01% THC

### VERSATILE, RARE CANNABINOID ENCOURAGES INNOVATION

THC-free CBC Isolate is manufactured under tightly controlled food-grade, cGMP manufacturing practices to deliver 95%-99% in CBC purity. Unlike traditional crystalline isolates, CBC Isolate is a thick, non-crystallizing oil with a viscosity similar to honey. This unique property not only simplifies measuring and mixing but also eliminates the need for thinners or cutting agents, making it a highly effective and stable ingredient for a variety of applications. Odorless and tasteless, it integrates seamlessly into formulations with minimal to no effect on flavor or aroma.

Thanks to its advanced production methods, CBC Isolate is now commercially viable and affordable. This proprietary process ensures CBC Isolate is THC-free and free from contaminants like heavy metals, mold and pesticides. Comprehensive third-party lab COAs are batch-specific and validate compliance, safety, potency and purity.

APPEARANCE	Golden Yellow
ODOR	Odor Free
DERIVED FROM	Farm Bill Compliant Cannabinoids

Ideal on its own or integrate CBC Isolate's non-crystallizing properties with CBD, CBG, CBN or other cannabinoids into tinctures, topicals, cosmetics or other fluid-like products to enhance stability, all the while capitalizing upon the synergistic benefits of the Entourage Effect.
